PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Attachment to Advisory Action

1. Applicants' amendment filed 7/30/2008 has been fully considered; however, the amendment has not been entered given that it introduces new issues that would require further consideration and/or search.
2. With respect to new issue, claim 1 introduces the new limitation "aqueous dispersion has an active substance content of 54% to 57% by weight". It is the examiner's position that this is a new issue since it requires aqueous dispersion to contain active substance in a specified amount in the range of 54% to 57% by weight in contrast to previously claimed amount in an open-ended range of more than 47% by weight of active substance in aqueous dispersion. Therefore, amendment would require further consideration and/or search.
